

Beginning with unit 10, you will need access to Microsoft Excel (2003, 2007, or 2010. the version from 2000 may also work but I have not tested it.)

If you have Excel then please proceed to step 2: activate the "Analysis ToolPak" Add-in (demonstration to follow)

unit10-video1 Page 1

If you do not have Excel and you are completely broke, then I suggest that you download a 60-day free trial of Office 2010. Go here:

<http://office.microsoft.com/en-us/try/>

If you are not completely broke and need Excel, then I suggest going here to buy Office 2010 Professional for \$79

<http://www.microsoft.com/student/office/en-us/default.aspx>
